"Advance College Credit Program"

An Experimental Program at Saint Louis University

This is an experimental program designed to enable the gifted student to have commensurate opportunity for enrichment and acceleration without becoming socially or psychologically dislocated within the educational system.

Under this program a high-school student can acquire a special type of advance college credit which may, under certain conditions, be transferred to a college record and be given full college credit status when the student enters college.

The Program

1. The University and a high school agree to cooperate in this program under the conditions set down herein.
2. The course(s) are selected by mutual agreement.
3. The course(s) are standard Saint Louis University courses to be taught at the high school; the high school agrees to use the textbook and syllabus used at the University and to reproduce the University course as closely as possible.
4. In each case the teacher must be approved by the appropriate University department(s) and/or school. The high school agrees that the teacher(s) of the course(s) will maintain close cooperation with the appropriate University department and will attend whatever briefing and consultation seminars may be arranged.
5. Students are selected on the basis of superior ability and achievement by the high school. Students must have junior or senior high school standing.
6. The students register in the "Advance College Credit Program" at the University and are given University library privileges. A moderate fee will be charged by the University.
7. The students take the course at their own schools but report to the University for the final (semester) examinations. The final examinations are

corrected at the University according to the standards adopted for regular college students.

8. Those who, by University standards, make grades of A, B or C will be given advanced college credit for the course. This credit will be entered on the student's record in the "Advance College Credit Program", but it is not formal college credit until a college accepts it for transfer from the Advance College Credit Program to full college credit status. Until the student enters college, the credit will be kept in "escrow."

The advance college credit is, then, not Saint Louis University credit. For student enrolling in Saint Louis University, however, the University guarantees to transfer all Advance College Credit towards quantitative fulfillment of the credit hours required for a Bachelor's degree provided the specific course(s) is/are required or accepted in the degree program elected by the student. In addition, the student will be granted appropriate advanced placement. The University and its several schools, however, reserve the right to determine (in advance) whether all corresponding specific requirements in each field will be waived.

(The grades received in advance college credit courses will not affect the college credit point average or the calculation of graduation honors at Saint Louis University.)

For students who enter other institutions, Saint Louis University will certify the program and the achievement of the student to the other institutions and will state its own interpretation and policy. Whether other institutions will grant full college credit status or not will depend upon their specific policies.
